# Hybrid ODF DIN Mounted HNCD 520 225

Optical Distribution Frame

Features

- For DIN rail mount
- Small dimension WxHxD 32x145x120mm
- Up to 12 fibers (using 6 x LC duplex cut out slots)
- Supports SC and LC adapters
- Power inlet connector Mini-fit
- Rating max 120 Vdc, 9 A
- Front serviced

Application

The Hybrid ODF is a part of Hexatronics Powered Fibre System and is optimized for field termination of Hybrid Micro cable.

Design

Premounted LC duplex blue adapters and holders for splice protection sleeves enables secure termination to pigtails. Power wires from Micro hybrid cable are easy terminated to the spring loaded terminal blocks. Eliminate special tooling, only standard wire stripper is needed.

The unit shall be powered with enclosed power cable cord according to the enclosed installation manual. Power inlet is designed with blocking for faulty polarity connection. Blue LED at power inlet indicate correct powering.

Tool-less mounting of the unit to standard DIN rail ensure fast and smoth installation.

The optical performance of the ODF connections used in the Hexatronic systems is ensuring the right quality and stability over time.

Hybrid ODF DIN Mounted HNCD 520 225

Included material

Cable ties and protection tube
Cable ties to fastened the hybrid cable to ODF and protection tube for power cords

Power cord
Power cord with MiniFit connector and open end for connection to DC power unit

Specifications

Material
The termination unit is made of painted Stainless sheet steel. All products are in accordance with RoHS.

Size, Weight and Color
Dimensions (HxWxD) ....145 x 32 x 120 mm
Weight ....0.3 kg
Color..................................Black

Hydrid ODF terminated with hybrid cable
